FOR IMMEDIATE RELEASE

Hatteras Introduces 64 Motor Yacht

New Design Reflects Intensive Owner Input, Innovative Layout

NEW BERN, N.C. March 1, 2005 – Hatteras debuted its new 64 Motor Yacht at the recent Miami International Boat Show. The new yacht boasts sleek, contemporary exterior styling matched to a luxurious interior, which is finished to industry-leading standards for real-wood interiors and architectural design features. The result of acute attention to customer input, the model's design features a fresh accommodation plan and intuitive touches throughout the vessel.

The 64 incorporates Hatteras' innovative convex hull shape, allowing for more interior space forward and providing for a softer ride in rough water. Deep propeller tunnels afford a 4-foot, 8'-inch draft, while efficient propulsion technology provides a top end speed of 28 knots to a vessel weighing a substantive 116,700 pounds, belying its solid construction and unmatched system components.

Inside, the 64 Motor Yacht features a 190-square-foot salon, while providing an ample 10 inches of side decks for access to the bow. Comfort abounds, thanks to custom furnishings and a logically placed entertainment center, featuring a 37-inch plasma TV mounted forward and to port.

Just three steps up, the salon opens into a 146-square-foot galley, dining and pilothouse area. The galley is fully equipped with top-of-the-line appliances, arranged in a U shape for cooking convenience. Upper and lower cabinets provide plentiful galley storage. Directly to port is a U-shape dinette with solid-surface table and large drawers underneath. The lower helm station leaves abundant room for guests and features single-lever electronic controls and a full electronics suite.

Below deck, a full-beam master stateroom features a tray ceiling, providing 83 inches of headroom. Twin nightstands, dressers and wardrobes mirror each side of the king-size berth, which features cedar-lined storage underneath. Dual hanging lockers add to the tremendous storage. For entertaining, a 20-inch LCD TV is standard along with a stereo and DVD player.

A spacious port guest stateroom features side-by-side twins, while the bow stateroom features a queen berth with cedar-lined storage. For those who require a fourth stateroom, a slightly reconfigured master allows for upper/lower berths.

The 106-square-foot aft deck provides convenient access to the swim platform and features fiberglass seating, a solid-surface table, ample lighting and stereo speakers. A fiberglass stairwell provides quick access to the bridge. Gas-assisted cylinders lift the stairwell for easy access to the engine room as well.

Up on the flybridge, a centerline helm assures unparalleled visibility forward. Twin helm seats and an L-shaped lounge with storage underneath provide ample seating, and a dry bar with refrigerator to starboard keeps entertaining options open. A modular design approach allows the owner to add additional cabinetry to house an electric grill or additional seating aft of the standard dry bar.

This complete package of performance, luxury, convenience and quality made for a successful Miami debut, with several units sold in both the U.S. and abroad.
